

watkins and smith, A fine and original 4.5" Gregorian telescope

Sold

REF: 376069

Diameter: 11.43 cm (4.5")

Description

A wonderful example of an 18th century Gregorian reflecting telescope in its original mahogany carrying case. The condition of this fine instrument is superb with the original lacquer overall length 72 cm

The partnership of Watkins and Smith only ran for a short while between 1763 and 1774
