

worthington telescope

Sold

REF: 55830

Width: 88.9 cm (35")

Diameter: 8.89 cm (3.5")

Description

An early 19th century telescope names Worthington but almost certainly by Ramsden, this model is a know design of telescope and Worthinton took over Ramsden and would have taken on the remaining stock and putting his name on it. The barrel splits in the middle and fits in the original mahogany case.
